## FOREWORD

Most of the 1870 Perry County census was easy to read . However, some pages were impossible to read. Any tiny bit of information was copied in the hopes that it would provide a needed clue. As is always the case there are many errors, both those made by the census takers and the person compiling the information. Great care has been taken to record the microfilm information as correctly as possible. We apologize for any errors.

Many times evident errors were made by the census takers. For instance-- a child of 1 attending school, a David as a female keeping house, a three year old girl having \$4000 real estate and \$1000 personal estate, while the farmer just below in the next line has nothing. One writer always spelled Elizabeth with an "a" in the center and another always used an "e". Please use this report only as a guide and then go to the original and check out the information yourself.

There are approximately 13,500 names in this work. It took approximately 250 hours to read the microfilm. The census taker signed for 353 pages. The acquisition of a new computer and new programs created a difference between page 34 and 35.

THANK YOU to those who have helped me with this work, Donna Timpner Vuichard, "young" Bill Timpner, Robert Morefield and Shirley Webb whose "prodding" has kept me moving along.

Hopefully you will find clues to that elusive ancestor of yours within these pages.
